PREFACE

The Bahamas National Statistical Institute is pleased to release the Disability Report which consists of the 2022 Census of Population and Housing data for All Bahamas, New Providence, Grand Bahama, Abaco and a consolidation of the remaining Family Islands. The 2022 Census Preliminary results were released April 2023 followed by the First Release in October 2024 and the Second Release in October 2025. This report represents the 3rd release of the 2022 Census.

The planning and execution of the 2022 Census were carried out primarily by the staff of the Institute with assistance from various public and private partners. As a result of the introduction of new technology, technical assistance was received from the World Bank and Statistics Canada. As The Bahamas is a member of CARICOM, the planning followed guidelines that were established by the Regional Census Coordinating Committee (RCCC). Therefore, the concepts and definitions used in this and previous censuses allow for comparability at the regional and international levels as well as with earlier censuses.

The 2022 Census was conducted utilizing the hybrid method of data collection during the period of April 4 to October 31, 2022.

The three (3) methods of data collection used were:

1. **Computer Assisted Web Interviews (CAWI)** - online self-administered interviews;
2. **Computer Assisted Telephone Interviews (CATI)**
3. **Computer Assisted Personal Interviews (CAPI)** - the traditional “face-to-face” interviews using handheld tablets.

Statistics derived from the 2022 Census questionnaire relating to the age, sex, marital status, educational characteristics and total annual household income of the disabled population are presented in this report. Additionally, data pertaining to private dwellings, households, head of households, types of dwelling structure and housing and dwelling characteristics of this population are also presented in this report. Please note that due to rounding, some of the totals may be off due to rounding.

TECHNICAL NOTES

Disability was first introduced to the census questionnaire in 1990. This was in keeping with the international recognition of the rights of persons with disabilities as highlighted by the United Nations' (UN) declaration "Decade of the Disabled Persons" (1983-1992). Many countries, The Bahamas included, introduced questions aimed at collecting information on the disabled population.

In 2001, the World Health Organization (WHO) issued the International Classification of Functioning, Disability and Health (ICF) which is the successor of the International Classification of Impairments, Disabilities and Handicaps (ICIDH), 1980. ICF defines disability as "an umbrella term for impairments, activity limitations, and participation restrictions". Disability as a topic that may be covered in censuses was included for the first time in the United Nations Principles and Recommendations (P&R) for Population and Housing Censuses, Revision 1 and was therefore incorporated in this country's 2000 Census. A decade later, with Revision 2 of the P&R, disability is to be included in censuses as a core topic and as such was incorporated in The Bahamas' 2010 Census questionnaire and planning.

Due to the change in the definition of disability over the years, the United Nation's P&R, Revision 4 and CARICOM encouraged countries to adopt the Washington Group (WG) on Disability Statistics for the 2020 Census Round. Disability as defined by WG is a complex and dynamic process that presents considerable challenges for data collection. Therefore, the Washington Group questions on disability provide a standardized set of universal questions that measure disability by the level of difficulty performing six basic, universal actions/capabilities. To this end, The Bahamas' 2022 Census questionnaire consisted of the WG's Short Set (SS) questions in an effort to better assess persons with disabilities nationally, also for international comparability and to monitor progress in attaining the Sustainable Development Goals (2030).

The Washington Group Short Set of questions consists of the respondent's responses to the following six (6) basic activities: - **(i)** Seeing; **(ii)** Hearing; **(iii)** Walking or climbing stairs; **(iv)** Remembering or concentrating; **(v)** Self-Care (washing all over or dressing); **(vi)** Communicating and speaking.

For each of these six activities, the respondents in the 2022 Census selected from **four (4) major responses**: - **(i)** No difficulty; **(ii)** Some difficulty; **(iii)** A lot of Difficulty; **(iv)** Cannot do at all. For the purpose of this national country report, individuals who reported the following responses in performing the six domains/functions (**Some difficulty; A lot of Difficulty; Cannot do at all**) were categorized as *“persons with disabilities”* (i. e. *Mild or Higher Disability*).

NB: For the purpose of International reports including the Washington Group Country Reports, *“persons with disabilities”* will be defined as follows -- *A lot of Difficulty* or *Cannot do at all for* any of the six functional domains.

Detailed disability data make it possible to compare persons with disabilities and the non-disabled in terms of educational attainment, family, and household status, etc., thus making feasible the study of disability within any cultural or environmental context.

It should be pointed out that due to the complexity and sensitivity of this topic, there are limitations in using the Census as a vehicle for collecting this type of data. Apart from limitations of space on the questionnaire, overburdening the census questionnaire with as many detailed questions as may be needed for such a specialized topic may jeopardize the collection of other necessary and basic information. To attempt to train census interviewers in the concepts and definitions relevant to this highly specialized area, and then to undertake the probing, that would be required is a major challenge. Ideally, data collection of this nature is therefore best left to detailed sample surveys using specially trained interviewers. Also hindering the process is the fact that there is still some reluctance in society to be open regarding persons with disability. Data obtained in the census should therefore be considered estimates of the number of people with disability and used as a benchmark for further investigative study through specialized sample surveys.

The Disability Section dealt with long – term issues (six months or more) which posed difficulty in performing certain activities. Subsequently, temporary medical concerns like sprains, broken limbs, etc. were excluded as it was expected that persons will recover from such issues in the short term. The questions pertaining to Disability in the 2022 Census questionnaire can be found in the appendix of this report.

DATA HIGHLIGHTS

This report presents a comprehensive body of information relating to the disabled population of the Bahamas. Tabulated data for all variables are provided for All Bahamas, New Providence, Grand Bahama, and Abaco. Due to the relatively small number of persons with disabilities residing in the Family Islands, data for these islands have been aggregated and are not presented separately due to confidentiality considerations.

Selected information presented in the tables is highlighted below to provide users with a concise statistical profile of disability in The Bahamas.

- Of the total population with disability 5 years and older in The Bahamas, 22,021 persons (57.1 percent) were females, while 16,530 persons (42.9 percent) were males [**Table 1.0**].
- A total of 38,551 persons with disabilities were recorded in the Bahamas, representing 10.3 percent of the population 5 years and over (**Table 2.0**).
- New Providence, by virtue of its population size, recorded the largest number of disabled persons aged 5 years and older, with 26,712 individuals representing 69.3 percent of the total disabled population in The Bahamas. However, individuals with disability accounted for 9.6 percent of the population aged 5 years and older in New Providence, which was below the national average. The Berry Islands (6.5 percent) and Harbour Island (5.9 percent) were the only other islands with proportions below the national average. The highest proportions of persons with disability were recorded in Ragged Island (32.7 percent), followed by Inagua (28.0 percent) and Mayaguana (27.8 percent) [**Table 2.0**].
- Seeing disability was the most commonly reported disability domain, with 18,860 persons experiencing some difficulty, 1,778 reporting a lot of difficulty and 419 indicating that they could not see at all (**Table 4.0.0**).
- Walking recorded the second highest level of difficulty among the disability domains. A total of 1,102 persons reported that they could not walk at all, while 2,961 indicated having a lot of difficulty. Additionally, 10,419 persons reported experiencing some difficulty with walking (**Table 4.0.0**).
- Remembering which is inclusive of concentrating recorded the third highest level of difficulty among the disability domains. A total of 253 persons reported that they could not remember/ concentrate at all, while 1,387 indicated having a lot of difficulty. Additionally, 6,303 persons reported experiencing some difficulty with remembering/concentrating (**Table 4.0.0**).

- According to the 2022 Census results, 74 persons or 15.1 percent of individuals who reported being unable to speak at all were of school age, between 5 and 17 years (**Table 4.0.0**).
- Compared to the non-disabled population, persons with disabilities were less likely to have never married. Among the population without disability, 218,120 persons or 67.5 percent had never married, relative to 17,264 persons or 44.8 percent of the population with at least one disability. In contrast, the percentage of persons with disabilities (single and multiple disabilities combined) were more likely to be married, with 13,071 persons or 33.9 percent reporting married status, versus 82,059 persons or 25.4 percent among the non-disabled population. Additionally, the population with a disability recorded higher proportions of persons who were widowed (4,430 or 11.5 percent), divorced (2,593 or 6.7 percent), and legally separated (913 or 2.4 percent) when compared with the non-disabled population (**Table 5.0.0**).
- Among the population with disabilities aged 5 years and older (single and multiple disabilities combined), 3,685 persons or 9.6 percent were enrolled in school on a full-time basis, while 557 persons or 1.4 percent were enrolled part-time. The majority of the individuals with a disability (34,306 individuals), were not enrolled in any educational institution at the time of the census (**Table 6.0.0**).
- Secondary education was the most frequently recorded attainment level among persons aged 15 years and older with one disability. The second largest category comprised college/university graduates, accounting for 5,494 persons or 21.9 percent. This was followed by post-secondary education 2,097 persons representing 8.3 percent of the population. Additionally, 1,193 persons (4.7 percent) had attained only primary education, while 451 persons (1.8 percent) had less than a primary level of education (**Table 7.0.0**).
- A common pattern observed across all disability domains was that the prevalence and severity of difficulties increased with age.

GRAPHS: AGE-ADJUSTED DISABILITY (MILD OR HIGHER) RATES

It should be further noted that the Washington Group on Disability Statistics specified that all countries submitting Disability Reports should ensure that the graphs and charts are age-adjusted. Age adjustment is defined as a statistical method to standardize prevalence rates across different populations. As it relates to disability, older populations generally report higher rates of disability and therefore, age adjustment ensures that true comparisons can be made across countries or regions with different age structures.

Whilst the tables in this National Report refer to age prevalence, Figures 1-13 with the exception of Figure 3 are age adjusted.

SECTION: HOUSEHOLD MEMBERS AND DEMOGRAPHICS

The following questions refer to USUAL RESIDENCE, and USUAL household members. A person's USUAL RESIDENCE is the place where that person lived and slept most of the time during the last six (6) months or intends to live for the next six (6) months. USUAL HOUSEHOLD MEMBERS are those persons who have this dwelling as their usual residence. Include everyone who usually lives here such as family members, lodgers and live-in employees (unless they have a usual residence elsewhere in The Bahamas). However, there are some special cases to note: 1) INCLUDE: persons temporarily away from home studying, working or to work for health care. 2) INCLUDE: persons with no other home who are staying at the dwelling. 3) INCLUDE: newborn babies (born by Census Day, who are still residing in hospital. 4) EXCLUDE: Persons who have a usual residence elsewhere. 5) EXCLUDE: Persons who are in an institution (i.e. prison, juvenile detention center, mental hospital, geriatric hospital) 6) EXCLUDE: Citizens of another country attached to the embassy, consulate or other diplomatic body of that country. 7) EXCLUDE: Members of the armed forces of another country stationed in The Bahamas.

H10. How many persons are USUAL members of this household (including yourself)? Refer to the "usual residence" and "usual household members" definitions above, and include all persons who usually live here.

[Instruction: Please include babies and small children. If there are no people who usually live here (for example, if this is a secondary residence or winter residence), enter 0.]

Type a number: _____

H16. Please record the names of the persons that USUALLY live in this household, even if they were not present on Census Day (April 4, 2022).

[Instruction: Record the last name first, followed by the first name]

Write one or more answers, pressing Enter key after each: _____

[Select one only]

Did you leave anyone out from the household members because you weren't sure if they should be included?

- 1 Yes
 - 2 No
-

Please review the following examples, and update the household members if needed.

- 1) INCLUDE: persons temporarily away from home studying, working or to work or for health care.
- 2) INCLUDE: persons with no other home who are staying there.
- 3) INCLUDE: newborn babies (born by Census Day, April 4, 2022) who are still residing in hospital.
- 4) EXCLUDE: Persons who have a usual residence elsewhere.
- 5) EXCLUDE: Persons who are in an institution (i.e. prison, juvenile detention center, mental hospital, geriatric hospital).
- 6) EXCLUDE: Citizens of another country attached to the embassy, consulate or other diplomatic body of that country.
- 7) EXCLUDE: Members of the armed forces of another country stationed in The Bahamas.

Number of persons listed does not equal Usual persons living here (HL1 + HL2 + HL3 =
_usual member).

APPENDIX II-

2022 CENSUS CONCEPTS AND DEFINITIONS

CONCEPTS AND DEFINITIONS

The concepts and definitions on which the Census questions were based were in compliance with the guidelines established by the Regional Census Coordinating Committee (CRCC). This was to allow for comparability at both the regional and international levels as well as with earlier census results.

1. Census Day

Census Day was Monday, April 4, 2022. This was the reference day, and therefore all questions on the questionnaire (excluding the Total Household Income, Technology and Communication, Economic Activity, and Fertility) referred to the circumstances of the residents on this particular day. The online component began the week of **Tuesday, April 5, 2022** and continued for one (1) month. Thereafter, field enumeration began utilizing the methods of **CATI** and **CAPI**.

2. Population

The Total Population consisted of the following:

- i.** Persons in their usual place of residence on Census Day e.g. family members, lodgers and live-in employees.
- ii.** Persons who were temporarily away on a business trip, on vacation or away at school or university.
- iii.** Persons in hospitals or other institutions.
- iv.** Newborn babies in hospital (born by Census Day – April 4th).
- v.** Persons with no fixed place of abode.
- vi.** Bahamians serving in the diplomatic corps who were resident abroad.
- vii.** Spouses who worked on another island but come home periodically.

3. Household

The term ‘household’ refers to a person or group of persons who live in a private dwelling unit. The concept of “household” is based on the arrangements made by persons individually or in groups for providing themselves with food and other essentials for living. Anyone of the following may constitute a household.

- i. A person living alone
- ii. One or more family(ies) with or without lodgers or servants
- iii. A group of unrelated persons living together
- iv. Occupants of an institution, hotel, convent, etc.

4. Supervisory District

A geographical area (synonymous with the 2017 political boundaries) for which data was collected.

5. Enumeration District

The smallest geographical area for which data is collected.

6. Marital Status

“**Marital Status**” is the personal legal status of each individual in relation to the marriage laws or customs of The Bahamas. The marital status options were as follows: -

Never married: a person who is single and has never been legally married.

Married: a person whose marriage has gone through a legal marriage ceremony in accordance with the law.

Widowed: the individual was legally married but his/her spouse has died.

Divorced: the individual was legally married but has gone through legal proceedings for the marriage to be officially dissolved.

Legally separated: applies to a married couple living apart as a result of the decision of the court or legal system of the country.

7. Building Unit

A building is any independent, free-standing structure comprising of one or more rooms or other spaces, covered by a roof and usually enclosed within external walls which extend from the foundation to the roof.

A building may be used or intended for residential, commercial or industrial purposes or for the provision of services. It may therefore be a factory, shop, detached dwelling, apartment building, shopping centre, church, repair shop, etc.

8. Types of Living Quarters

For Census purposes, dwellings are divided into **two (2) main groups** as follows:

- (i) **Private Dwellings** are those in which a family or other small group of individuals reside, such as a single house, apartment/flat, or townhouse. In the event that a private home/dwelling is physically located within an establishment or on a compound, you will be required to state the name of this establishment at the appropriate question. For e.g. the following should be stated - Atlantis Hotel; Bahamas Department of Corrections.

- (ii) **Collective Dwellings** include such special types of dwellings as hotels, institutions (e.g. hospitals, the prison, military barracks, convents, children and old folks' homes, etc.) and other group quarters in which fairly large numbers of unrelated persons are likely to reside. *Boarding houses and other homes, regardless of the number of persons must be treated as collective dwellings.*

9. Dwelling Unit

To be classified as a dwelling, living quarters must be structurally separate and must have a private entrance either from the outside or from a common hall, lobby or stairway inside the building. The entrance must be one that can be used without passing through anyone else's living quarters.

10. The Status of Dwellings

Dwellings can be categorized as follows:

- i. **Occupied** - during the period of the census, persons were currently living in the dwelling unit.
- ii. **Vacant** - any dwelling unit which is suitable for occupancy but was unoccupied at the time of the census.

11. Status of Vacant Dwellings: -

- i. **Winter Residences:** private dwellings that are owned by persons from abroad.
- ii. **Secondary Residences (Domestic):** private dwellings that are owned by Bahamians.
- iii. **For Rent:** private dwellings which are "For Rent".
- iv. **For Sale:** private dwellings which are "For Sale".
- v. **Other:** Included seasonal vacancies such as vacation or holiday homes, time-share units
 - a. And seasonal workers' quarters/complexes (dwellings used to house temporary
 - b. Residents / workers of a project).

12. Head of Household

For census purposes, every household must have only **one** Household Head or Reference Person. This individual is that person who is acknowledged as such by the other household members; this is usually (but does not have to be) the person who bears the chief responsibility for the economic maintenance of the household. Customarily, this individual is usually 18 years or older.

13. Whom to include as Head of Household

You must record the **usual residents** of the Household. You must also distinguish between persons residing in their usual residence (**i.e. where they regularly sleep**) and persons residing **temporarily** in the dwelling who have a usual place of residence somewhere else.

14. Room

A room is defined as a space in a housing unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering. For example, the room should be of a size large enough to hold at least a single bed for an adult. The total number of rooms should therefore include bedrooms, living rooms, dining rooms, studies, habitable attics, servant's rooms, recreation rooms, rooms used solely for business purposes and other separate spaces used or intended for dwelling purposes, so long as they meet the criteria of walls and floor space. **DO NOT INCLUDE** bathrooms, kitchens, walk-in-closets, pantries, halls or foyers, regardless of the size.

15. Bedroom

Bedrooms are mainly used for sleeping and exclude makeshift and temporary sleeping quarters. Count all bedrooms including spare bedrooms not occupied.

13. Tenure

Tenure which is the right or title by which a BUILDING is occupied. This does not refer to the land.

i. -Owned Fully

Owned fully means that the dwelling belongs to the head of the household or other members of the household or any type of co-ownership arrangement AND it is fully paid for i.e. no mortgage / claims exists for the dwelling.

ii. Owned (Mortgage)

Owned (mortgage) a dwelling which is not fully paid for such as one which has a mortgage or some other claim to it.

iii. Rent

Rent means that the dwelling does not belong to any member of the household and payments are usually made monthly for occupancy of the dwelling unit.

iv. Rent Free

In this case, no member of the household pays rent for occupancy of the dwelling. In other words, the dwelling is provided free of charges, whether or not in return for services rendered e.g. parsonage or government housing.

14. Toilet Facilities

If the dwelling is equipped with or has access to flush toilet facilities, you must ascertain whether the method of sewage disposal is by connection to a “public sewer” or by means of a “cesspit” or “septic tank” on the property which the dwelling is located. The options are as follows: -

(i) Flush toilet linked to public sewerage system: empties into a public sewerage disposal system.

E.g. Some households in New Providence: Yellow Elder Gardens, Elizabeth Estates and some new sub-divisions. Grand Bahama: some households in Bahamia.

(ii) Flush toilet with cesspit or septic tank: empties into a septic tank or soak-away, located on the premises of the dwelling unit. This is the more popular form of sewerage disposal.

(iii) Pit latrine: outside toilet

(iv) Other: any type other than those listed above. E.g. slop bucket, portable toilets, etc.

(v) None: If a dwelling does not have toilet facilities, E.g. the bushes select –

15. Water Supply

The Census seeks to obtain basic information on whether housing or dwelling units have or do not have a piped water installation. In other words, whether or not water is provided to the housing unit by pipes from a community-wide system (Government) or a private installation, such as a

pressure tank or pump. It is also necessary to indicate whether the unit has tap water inside or not and whether it is within a certain distance from the unit. Besides the location of the tap water, the source of water available to households is also of interest.

i. Public Water

Implies that the water is from a public source or government-owned (e.g. Water & Sewage) and therefore, it is generally intended for use by all persons in the community.

Examples include: -

- a) Public stand pipe
- b) Public well or tank

Note: If the water source is connected through public means or is obtained from any other public sources, then the source is a “public” one.

ii. Private

Implies a personal water source; it is not owned by the Government but by the household or landlord and it is usually not intended for public use.

Examples include: -

- a) A well
- b) Tank
- c) Spring or other privately-own sources located on the property on which the dwelling is situated.

iii. Piped Water

Refers to water which is piped (connected) into the dwelling or yard and can be controlled by a tap.

NOTE: the most significant information from a health point of view is whether the housing/dwelling unit has piped water within the premises. Therefore, the recommended classification options of housing/dwelling units are as follows: -

iv. Public, Piped into Dwelling

This describes a situation where water from a public source (the Government/Water & Sewage and Grand Bahama Utility Company) is piped directly into the dwelling unit. Therefore, when the faucet/tap is turned on inside the dwelling unit, running water comes from the tap.

v. Public, Piped into Yard

In this case, the household receives water from a public source (the Government/Water & Sewage). However, the water is piped into the yard or compound on which the dwelling is located.

NB: this water source only goes as far as the yard but not connected to the dwelling. However, it is provided by Water and Sewage.

vi. Private, Piped into Dwelling

Refers to water supply which is owned by the household or landlord and is piped into the dwelling that is, when the faucet/tap is turned on inside the dwelling unit, running water comes from the tap. An example includes a privately-owned water tank/privately-owned electric pump.

vii. Private not piped into Dwelling

The water source is owned by the household or landlord. There are no pipes or connections that lead to the house. Usually this type of water source is just simply located on the premises. E.g. Well; Hand pump (located on one's property).

viii. Public Standpipe

This is where water is publicly available to the household from a standpipe or hand pump on the side of the street or elsewhere in a community.

ix. Public Well or Tank

This refers to a case wherein water is available to the household from a public well or tank. For example, a public well or tank at a central location in the community that is accessible to everyone.

x. Rain Water System

A system wherein a householder builds a tank on the side of the dwelling and catches/obtains water whenever it rains. This type is usually found on the Family Islands but some houses on New Providence also use this water source.

xi. Bottled Water

The household purchases purified water such as Aquapure, Chelsea's Choice, etc. for drinking and other purposes.

xii. Other

This option should be selected if the respondent's answer does not fit in any of the above categories.

16. What is the construction material of the outer walls?

This question seeks to determine the type of material used for the construction of the outer walls of the dwelling. The options are listed below: -

- i. Wood** is the hard substance that make up the trunk and branches of trees or shrubs, used for timber in construction **e.g. lumber, plywood.**
- ii. Concrete/Masonry Block** is a standard size rectangular block used in building construction.
- iii. Wood and Concrete** structure that is part wood and part concrete.

- iv. **Stone** the hard, solid, non-metallic mineral of which rocks are made.
- v. **Brick** a type of block made from clay-bearing soil, sand and lime or concrete materials.
- vi. **Slab Concrete** a large flat piece of a hard material such as concrete.
- vii. **Stucco:** a cement based plaster made of lime, sand and water applied over wood and other surfaces.
- viii. **Composite (Stucco and Styrofoam)** part stucco and part styrofoam. Styrofoam is an insulation board used in walls, roofs and foundations as thermal insulation and water barrier.
- ix. **Hardie Plank** is fiber-cement siding that comes in **long, horizontal strips**, just like **wood lap** siding (**clapboard** as it is called in The Bahamas). It is also a combination of cellulose (wood), fibers and cementitious materials.
- x. **Hardie Panel**, also composed of fiber-cement, is the **tall, vertical version of Hardie Plank**, at 48 inches wide by 96 inches to 120 inches long.
- xi. **Other (Specify):** any type other than those listed above e.g. **Straw, Hardie Panel**, etc.

17. Lighting

This question seeks to determine **ALL** the ways in which lighting is provided or produced in the dwelling. **All** of the various sources/types of lighting the household has should be selected.

NB: based on the answers provided by the respondent, he/she is required to state the MAIN source of lighting.

The options and corresponding examples are listed below: -

- i. **Electricity** – Bahamas Power and Light (BPL) and Grand Bahama Power Company (GBPC)
- ii. **Generator** (Gas, Diesel and Solar)
- iii. **Solar Power** - Powered by the sun
- iv. **Oil** – Kerosene Lamps **Gas** – Some Lanterns

21. How many motor vehicles are owned by members of this household?

This question generally refers to motor vehicles used as personal domestic (household) transportation and should include cars, trucks, vans, golf carts, or any other motor vehicle used in this manner. Vehicles used solely for commercial or business purposes, e.g. taxis, buses, haulage vans, etc. and company vehicles driven by household members were excluded.

22. What was the total household income for the past twelve (12) months? (i.e. April 2021 to March 2022) Round off to the nearest dollar.

The purpose of this question is to obtain income of all members of the household from all sources, which was earned, gained or obtained during the past 12 months. This includes income from wages and salaries, as well as, income from property or other investments, private educational scholarships, pensions, welfare, alimony, child support, etc. Domestic household members' income (E.g. live-in maids, butlers, etc. was excluded).

DEMOGRAPHIC AND SOCIAL CHARACTERISTICS

What is Religion/Denomination?

This question seeks to determine an individual's spiritual belief or affirmation. The person does not have to attend church to declare a particular religion.

SCHOOL ATTENDANCE

This question aims to find out those persons were attending a school/educational institution at the time of the Census whether face-to-face or virtually.

Face-to-Face refers to the traditional classroom setting where the teacher provides instruction to the students.

Virtually refers to a learning experience wherein an electronic device (e.g. tablet, computer, laptop, etc.) is used along with the internet.

DEFINING “SCHOOL ATTENDANCE” & “SCHOOL”

“SCHOOL ATTENDANCE” means regular presence at an educational institution or a specific programme of study. A systematic and organized approach to learning must take place. Therefore, day care facilities and nurseries where only occasional ABC’s numbers/counting and colors are taught are excluded for the purpose of the Census.

REGULAR/TRADITIONAL LEVELS

- 1) Pre-school (3 years old and above) [K3 – K5]
- 2) Elementary or Primary School [Grades 1 – 6]
- 3) Secondary School (junior high school, senior high school, technical high school, etc.) [Grades 7 – 12+]
- 4) Post-Secondary/Technical/Vocational Institutions
- 5) Universities (including Colleges) which offer high school or university courses leading to an Associate Degree or higher
- 6) Seminaries, schools for the blind and deaf and other institutions providing an equivalent type of general education.

Additionally, **“SCHOOL”** also includes –

1. Correspondence programmes
2. Long distance and Internet programmes
3. Other certifications

HOME SCHOOLED

Home Schooled refers to parents or legal guardians who ensure that their children are educated, by voluntarily assuming the responsibility for their tuition and educational instruction, which is offered principally in the home environment. Parents can seek the assistance of tutors within the home to provide additional instructions.

School Attendance can be FULL TIME or PART-TIME. Definitions are listed below.

FULL TIME: Persons whose main daytime activity has been attending a traditional/regular institution

PART-TIME: Persons whose main daytime activity is not related to regular schooling but they are attending a traditional/regular institution

HIGHEST LEVEL OF EDUCATIONAL ATTAINMENT

Educational attainment refers to the highest level of attainment that an individual has successfully completed. This view provides a quantitative assessment of a person's educational accomplishments and serves as an important indicator of their knowledge, skills and abilities.

What is the HIGHEST qualification obtained up to the present time?

Educational Qualifications are defined as the certificates/ diplomas, degrees, professional titles, etc. that an individual has obtained. For the purpose of the Census, educational qualifications imply successful completion of a course of study or training programme. Therefore, for the purpose of the Census, honorary degrees, entrance exams and scholastic exams such as the Grade Level Assessment Test and the Scholastic Aptitude Test were excluded. This question sought to identify the highest qualification completed/obtained.

The 2022 Census made a distinction between the school leaving Certificate and the High School Diploma.

The difference between school leaving certificate and high school diploma is as follows”-

School Leaving Certificate - The individual/student has completed 12+ years of education but has not met the High School Diploma Criteria.

High School Diploma - The individual/student has completed 12+ years of education and has met the High School Diploma Criteria.
